

# HHV BARMILL

INTELLIGENT MILLING, AUTOMATION EXCELLENCE

## ACCELERATE YOUR ROI

Imagine feeding 200 inch bar stock into a machine which rotates the bar to have access from all sides – this is BarMill. We're not talking lathes, we're promising aluminum milling like no one else can deliver with huge opportunity for operator efficiency. No sitting and waiting to manually feed, clamp and cut stock. Machine 4-axis parts and experience 40-60% faster cycle time while reducing raw material usage by 20-30%. Utilize your precious labor for things more important than pushing cycle buttons.

Modig means innovation. There is no room for compromise in quality at Modig.

## EXCELS AT THESE PARTS:

- 3 and 4 axis parts within 5x5" in cross-section
